

Clark Forklift Parts

Clark Forklift Parts - Performing globally, there are currently 350,000 Clark forklifts and lift trucks in operation, with upwards of 250,000 of those in commission in North America. Clark has five major lines of lift trucks across the globe, making it one of the most expansive companies in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, covers more than 120,000 particular parts intended for 20 distinctive models of lift trucks and automated equipment. Your local Clark Seller is your total source for availability of all your components requirements supplied by Clark Totalift.

Clark features a exceptional Parts Distribution team. The components warehouses are conveniently positioned in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their buyers and their sellers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Motivated to provide the highest level of value and service to our clients, Clark remains on the leading edge when it comes to improving productivity and benefiting performance.

Worldwide, Clark has one of the most impressive dealer support networks. With over 550 locations globally, seller representation in over 80 countries and 230 locations in North America, their high level of dedication to their customers predominates the materials handling market.

Clark proudly remains an progressive leader of the material handling industry, revolutionizing protection features such as the worker restraint system. This exceptional dedication to safety is now a customary feature on every lift truck.

Clark has a relentless objective to have the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be internationally certified with quality standard ISO 9001 in all of its production plants. Additionally, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any environmental limitations, thus placing them in a dominant market position.

Clark has selected the structure of "Lean Manufacturing" at all of its assembly facilities for the reason that this system is particularly economical and allows for minimal use of resources. Developed to ensure maximum proficiency, this system is intended to discover and acknowledge the most effective methods for production facility stewardship. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Clark's product engineers and suppliers communicate together to improve the effectiveness and excellence of their merchandise while minimizing expenses. The new value engineering agenda combines innovative product improvement and offers improved consumer support and service within the industry.
