

Barrel Clamp

Barrel Clamps - Known as "Barrel Clamp", this particular hydraulic accessory is actually used on lift trucks to compress objects that you want to transfer utilizing the forklift. Normally, they're utilized to paper rolls, barrels, and handle kegs, with a few barrel clamp designs having the ability to rotate the load. Like for example, the rotate function enables the individual operating the forklift to be able to slot in a vertically stored paper into the horizontal intake of a printing press.
