

## Work Platforms

Work Platforms - Lift truck platforms add more flexibility for those who should reach elevated heights utilizing their forklift. These platforms will make it easier for employees to work safely and effectively at high levels. Lift truck platforms are an economical solution for businesses as they are much more cost effective compared to acquiring specialized machines. These platforms are even desirable as they can save a lot of storage space. To maximize the benefit and full potential of this particular machine, you will have to find the lift that best fits the work tasks you have in mind.

Slip-On platforms are easy to set up for the reason that all you do is slide them onto the lift truck, lock them into position and they are set to operate. Slip-on style accessories have gained enormous popularity since they are easy and quick to work. They offer an inexpensive answer for companies that do not require them on a regular basis. These platforms have a railing system in place, skid proof decking and tie offs accessible. They still need the use of safety machinery by staff but come with these specific features in order to further the safety of individuals who will be using them. Slip-on work platforms are an ideal option for those projects which take place in difficult places or over top of an object.

This type of platform lift can be secured with a pin after sliding the platform onto the forks. The industrial lift platform provides extra protection with three rails and a safety screen covering the rear. For additional safety, it is a good idea to consider choosing a style which opens through the front railing rather than the side gate unit.

Stock pickers can attach onto a forklift utilizing the same foundations as other platforms but are much different. Stock pickers often have a much slighter base surrounding by a front guard partition and railings on three sides. This particular unit differs from the other platforms in view of the fact that the cage and the surface do not take up the entire fork surface area.

Combination platforms have proven to be extremely useful when staff need to work with supplies a height. This kind of platform has a smaller and larger section. This design is essential so that staff can accomplish their task and not have to concern themselves about any supplies sliding onto them if the one operating it tilts or tips the items.

There are a lot of attachments available that can attach to your platform so as to improve its effectiveness a lot more. For bigger supply items such as piping, tall racks equipped with their own guardrails are an outstanding choice. These racks keep supplies like brooms, pipes as well as various things from falling off of the platform and hitting other workers. For additional performance, there are trays, tools and toolboxes designed to attach directly onto the side of the guardrails.
